

Advanced Programming [AP-2018]

Third Programming Assignment - Instructions

- 1) The programming assignment consists of five exercises asking you to write some Python scripts.
- 2) The solutions to the exercises, collected in a single file named **ap18helper.py**, should be sent by email to the lecturer (andrea@di.unipi.it), indicating clearly in the Subject: “[AP-2018] Solutions to Assignment 3”.
- 3) **Deadline:** Students are invited to solve the exercises and to submit the solutions as soon as possible. The deadline is **January 15, 2018**. If you plan to take the oral exam in January, **the hard deadline is 5 days before the date of the oral exam**.

Exceptions are possible for strongly motivated reasons, to be discussed with the lecturer. If you want an extension, ask the lecturer by email before the deadline.
- 4) Submissions are individual. Students can cooperate when solving the problems, but each student is responsible of his/her own solutions and must be able to comment the code and the design choices, and to modify it upon request.
